New York 17, New York

P. M. #409

Dear Mr. Helferich:

I am enclosing a disclosure on the electrets formed from polyethylene terephthalate films. Also, I am enclosing some background material which may be of some value in writing the application. We have discussed this invention with Howard Kothe a number of times when he has been down here and he is rather familiar with the information.

Sincerely,

TCH

(Mrs.) Thelma C. Heatwole
